

## **Romania-Spain experience exchange in prevention projects**

A delegation lead by quaestor Lucian Fuică – General Director of the National Anti-drug Agency is on a study visit in Spain, 18-25 March, 2007.

The visit should enable an experience exchange between the two countries in order to develop and implement specific projects of drug demand reduction at central and local level.

The visit is related to the activities foreseen in the Institutional Twinning Project RO/04/IB-JH-08 “Strengthening the institutional capacity of the Romanian agencies involved in drug demand reduction”.

During the meetings held during this visit, the NAA specialists shall be familiarized with project management means and techniques used in drug use prevention by the Spanish part, in order to use their experience in the prevention programmes of the National Anti-drug Agency.

The opportunity to know models of good practices in drug demand reduction offered by this activity of the Institutional Twinning Project will enable the future elaboration of sound projects by the NAA aiming to attract and use structural funds as efficiently as possible.
